

## Wey-TEK™ Refrigerant Charging Scale

### OUTSTANDING DURABILITY AND THE BEST ACCURACY AVAILABLE IN A 220 LB. SCALE

The Wey-TEK Refrigerant Charging Scale continues to set new standards in affordability and accuracy with a higher weight capacity—220 lbs., twice that of many other scales—at a competitive price. With Wey-TEK, you can easily weigh and charge from the same large platform.

Wey-TEK is very easy to use. Its high-accuracy load cell gives the correct reading every time (no matter where the cylinder is on the weighing platform), and you can read its large LCD display at a distance, even in direct sunlight. This high-performance scale features a weighing platform constructed of two durable metal plates and comes with a plastic carrying case for even greater protection and convenience.

#### FLEXIBLE AND FUNCTIONAL

Turn your Wey-TEK into an automatic charging station with the optional charging module. This convenient accessory allows you to automatically and accurately charge HVAC/R systems with any amount of refrigerant you wish.

Simply place your cylinder on the weighing platform, connect your cylinder's hoses to the module's fittings, set your target charge amount and walk away – the charging module will shut off when the programmed charge amount is transferred to the system.

The scale and module can be purchased as a kit, or you may purchase the module separately later to upgrade your Wey-TEK.

#### Wey-TEK FEATURES

- durable cast aluminum weighing platform
- measures in lbs./ozs., kgs. or decimal lbs.
- large LCD for easy viewing, even in direct sunlight
- auto shut-off after 30 minutes to conserve battery
- high-accuracy load cell won't drift
- automatic and manual zeroing (taring)
- hard plastic carrying case included
- 2-year replacement warranty

#### Charging Module FEATURES

- charge / hold key allows interruption of the charging process
- displays target charge and total refrigerant transferred
- provides power to the scale
- programmable in ¼ oz. increments
- 2-year replacement warranty

Wey-TEK refrigerant scale with optional Charging Module

## SPECIFICATIONS

### Wey-TEK Scale

Base unit includes:	Weighing platform, control handpiece, communication cable, one 9V battery, plastic carrying case
Weighing capacity	220 lbs. (100 kg.)
Accuracy	± 0.25 oz. (10 gm.)
Resolution	0.25 oz. (10 gm.)
Controls	On/Off, Zero Units selection (English/metric)
Display	LCD visible in direct sunlight; Units: lbs./oz. or kg./gm. or decimal lbs. Low-battery indication; Over-range indication
Scale zeroing	Auto with power-on; Manual
Power	9V alkaline battery (included) for approximately 50 hours of continuous operation
Warranty	2-year, replacement

### Charging Module

Base unit includes:	Charging module, communication cable, AC adapter, oversized carrying case for all scale and module components
Max. refrigerant transfer	999 lbs.
Connection size	1/4" refrigerant flare
Charge increments	0.25 oz. (10 gm.)
Controls	Charge/hold, clear, increase and decrease charge amount
Display	LCD visible in direct sunlight; programmed charge amount; amount of refrigerant transferred
Warranty	2-year, replacement

### Wey-TEK & Charging Module / ACCESSORIES

Wey-TEK scale	713-202-G1
Charging module	713-702-G1
Wey-TEK scale and charging module combination	713-203-G1
